

Media Examples of Empathy

Find three media examples of empathy. These media examples can be taken from movies, TV, short films, documentaries, YouTube videos, etc. Include the title of the video and the url. If you can, provide a picture of a still from the video. Write one paragraph that briefly describes what the video is about. Write two paragraphs that explain empathy related to any of the various themes presented in the course (i.e. empathy versus other types of pro social behavior, different types of empathy, nurturing your physical body, nurturing your mental health, encouraging empathy in children, empathy in relationships, self-empathy, empathy and other constructs like hope or competition, etc.).

Students can then show the videos during a designated class time.
