ACUTE ILLNESSES DETECTED BY SCHOOL NURSES

These figures come from a sample of 31 nurses new to nursing, hired into rural school districts. Nurses were polled quarterly on the number of cases they observed for the ten most common pediatric illnesses, and case numbers were summed for the entire 2022-2023 school year.

^{**}Not all nurses participated in all four surveys and student populations changed at each time. This infographic was last updated in November 2023..

Cases reported by ASAP Nurses in the 2022-2023 School Year No. of Cases Detected by School Nurse Seasonal Flu 315 **Sinusitis** 236 **Ear Infection** 223 Lice 216 COVID-19 193 A total of 1,427 acute Rashes 147 Illnesses were identified from 26,819 students served Hand, Foot, and Mouth 76 throughout the four times. **Pertussis** 9 School nurses helped identify acute illnesses Chickenpox amongst 5% of this student population in the 2022-2023 school year. **STIs**
