Understanding How Teachers Support Student Leadership during the Better Together Challenge Program

Undergraduate Research Assistant Opportunity

FAS 390 – Supervised Research Experience (93390)

Are you interested in conducting research with middle and high school students?

In the Better Together Challenge Study, you will have the opportunity to facilitate focus groups with adolescents, transcribe and summarize focus group data, assist with data management tasks, and learn about both qualitative and quantitative methodologies.

What is The Better together Challenge?

The goal of the Better Together Challenge is to support students and teachers in creating school environments that are safe, inclusive, and equitable for all students, thereby promoting the idea that positive and inclusive school relationships help students thrive in the classroom and beyond.

What is the time commitment?

Research assistants will be asked to register for two or three credit hours for both the Fall 2018 and Spring 2019 semesters (one credit hour equals three hours of work per week).

What are the benefits?

Undergraduate Research assistants will learn about research design and implementation and will receive mentorship from ASU faculty and graduate students. Students will gain the necessary experience for making career decisions and applying to graduate school. As a research assistant, you will join a research team committed to understanding and promoting safe, inclusive, and equitable environments in schools!
